February 23

ISSUE 72

## From the Editor's desk

The month of February is one month short of the end of the current academic session but it is also one month short of the start of a brand-new academic session, full of a million new opportunities. The students are bracing themselves for the forthcoming annual examinations. The school also bid adieu to the outgoing batch of class XII and wished them much success in life.

It's heart-warming to watch students enter as a docile child and later walk out of school portals as confident individual, ready to face the challenges life throws at them.

"Being challenged in life is inevitable, being defeated is optional." – Roger Crawford.

All the Best to all my dear students. Go seize the world !!!

*You have to **DREAM,**  
before your dreams can come true.*

According to science, music is a uniform sound produced by regular vibrations that sound pleasant. But according to me, music is so much more than that. It understands me and lightens my soul. Everything is better with music in it and for me, the world would be almost empty without it.

"If music is the food of love, play on. Give me excess of it; that surfeiting, the appetite may sicken and so die." Said, Shakespeare.

The magic within the Sargams, ragas and Taals of classical music is not just entertainment, but also a form of meditation. Legends say that Tansen could bring rain upon the earth when he sang Raag Megh Malhaar. My mentor Mr. Rajab Ali Bharti has made it possible for me to discover this field of music. With his efforts, not just me but many other students have been able to participate and win many National and International

Competitions. Under his guidance, I have learned many new things, like when he said – "Music is a special art. The kind of art when grasped correctly, will undoubtedly make you a better human being. It will mould the person into an all-rounder" and I found it true. I have experienced a change in me from the inside as well as the outside. It is true when they say "Music is the strongest form of magic and if you haven't discovered it yet, then you haven't yet seen the world."
