Singhanians' Chronicle

From the editor's desk

'Education is not the learning of facts, but the training of the mind to think.' Albert Einstein

There is nothing impossible in this world everything can be achieved with patience, time and hard work. We should always be determined. We must never lose hope. Whatever you have achieved till now is because of the hard work you have done so far. If you set a goal and work hard for it , then it will be yours. But we should keep in mind that we are not in a fairytale and life is not about magic. So, luck needs help and that help is the hard work and effort you put. Working really hard makes you lucky. If somebody puts you down or criticizes you , just keep on believing in yourself and turn it into something positive. When you develop a positive attitude you will start feeling better about yourself. You will treat yourself with more respect and love and this in turn, will boost your confidence levels and inner strength. You will take on new challenges and come out of your self- limiting beliefs .
