

## From the Editor's Desk -

Destiny is not a matter of chance; it is a matter of choice.

At Singhania, we write our destiny with hard work, dedication, grit and commitment.

Destiny is human's hardest fear. The future is unknown and man has always feared the unknown. But sometimes letting time take its own course while doing what best we can do may be the best way to create the future that we have dreamt of. We do not have the power to control things that happen around us.... But we certainly have the power to decide how we respond to them. Sometimes, things don't work out – but that's got nothing to do with destiny. Destiny always has a way of showing what's important to us and it's not always a chance.

Probably destiny is a matter of FAITH.... FAITH in ourselves has made everything possible. Winning Best Co-ED. School of Kota for the ninth consecutive year was a matter of choice. We wished for it, worked for it and finally made it.

Thank you almighty!!!

Hoping that our readers had a great festive month.

"I want to thank you, Lord, for life and all that's in it. Thank you for the day and the hour, and the minute." - Maya Angelou.

Great ability develops and reveals itself increasingly with every new assignment. Young children have an ocean of hidden talent amongst them and it was displayed at Sir Padampat Singhania School, Kota on 14th October 2022 at the Inter House competition – “Unlocking Talent”. SPSS always strives to nurture the inherent potential that each student has. With the same spirit, a platform was given

## Importance of Education in society

Education is a process of expediting learning, acquiring knowledge, values, and virtue. It contributes to the development of better people around the globe. It is more of an enduring method in which people gain information, skills, and ethics.

Education acquaints youngsters with the atmosphere around them. It encourages them to be more mindful of their strengths and flaws and teaches them to drive their focus in the right direction.

Education teaches children that failure is not an end; they should try until they succeed and never give up. It fuels their determination to live in the world autonomously and encounter any circumstances bravely.

Childhood education help children develop honesty, kindness, generosity, courage, freedom, equality, and respect. It frames better behaviour and adds discipline.

Education is a ray of light in the darkness. It certainly is a hope for a good life. Education is a basic right of every Human on this Planet. To deny this right is evil. Suffice it to say that education matters. Studies have shown that those who are more educated are more likely to live longer, live healthier lives, and are even more likely to help strangers. Investing in various types of education from the time children are young ensures that they have a strong foundation and that the whole person is being educated. The more diverse and well-rounded we can make education for children, the better educated they'll be
